Spirion Sensitive Data Platform Release Notes

Sensitive Data Platform (SDP) Release Notes

Version 22.Q2.2
Release date: 06.01.2022

SDP New Features

- No new feature in this release

SDP Enhancements

- Updated OAuth2 to OAuth2 version 2.0 in Microsoft online URL to facilitate MIP updates
- Updated the Delete Classification pop-up window to display a message to delete the classification from the playbooks first before deleting it from the Global Classifications screen if the classification is associated with a playbook
- Modified the Target screen to delete the white spaces from the user entered credentials when displaying data in the payloads
- Updated the footer of the pages with a grid to allow manual control of the pages when clicked on the ellipsis icon in the pagination
- Changed 'MON' label to 'Watcher' on the Agent Management screen
- Moved the Add Photo option from User Management screen to the User Profile screen.

SDP Bug Fixes

- Resolved MIP Label Sync Issue
- Disabled the Use Classification Prefix check box on the Add Classification pop-up window when a custom type classification is selected
- Resolved the complex Playbooks issue to correctly execute and perform the correct manual action
- Updated scan results filters to display all agents' results when using distributed scans
- Resolved issue where scans 'last used' status was not accurately reported
- Removed red highlight from Upload Status error messages
- Resolved Playbook 500 errors when updating Playbook currently in use in a scan
- Added hyperlinks to Scan Coverage Details for Scan Name and Playbook Name
- Enhanced Scan Coverage screen to display large numbers of Playbooks
- Enhanced error messages when adding duplicate users in user management
