Sensitive Data Platform (SDP) Release Notes

Version: 13.1.2
Release Date 03.12.2024

Spirion Sensitive Data Platform Release Notes

Sensitive Data Platform (SDP)
Version 13.1.2
Release Date: 03.12.2024

Improvements and New Features

- Improved Parallel Scanning: This release is the newest iteration of Discovery Teams/Distributed Scans with the ability to now implement massive parallel scans on certain data stores.

Bug Fixes:

- [AL-29334](): Resolved issue where remote full computer scans only scanned locally.
- [AL-29336](): Resolved issue where upgrading from 13.0 without also reinstalling RabbitMQ caused connectivity issues.
- [AL-29337](): Resolved issue where RabbitMQ credentials were not defaulting to lower permission sets.
- [AL-29363](): Resolved issue where too many of the same match in the file resulted in too large of a chunk being shipped to the console.
- [AL-29372](): Resolved issue where some office files cause scans to be disrupted
