Spirion Sensitive Data Platform Release Notes

Sensitive Data Platform (SDP) Release Notes

Version: 22.Q1.1

Release date: 02.01.22

SDP New Features

- Removed the ability to stop an in progress scan due to an issue where the on-prem agent could refuse further scan requests

SDP Enhancements

- Added a search box to the Select Items page of the Playbook Decision Nodes to find options easily
- Added address syntax messages to Add New Target page for Remote Target addresses
- Added Refresh buttons to all pages with a grid
- Added Scan Results pre-filtering page so that the next Scan Results screen loads the data faster
- Assigned Spirion's Default policy to the Agents in the Agents Screen to reset settings to baseline
- Added a Return to Login link on the Forgot Password page
- Playbook Navigator can now be moved to any corner on the Playbook Builder and on the Matches section of the Playbook Executor page
- Playbook Navigator displays the color that corresponds with the colors displayed in the associated Playbook to make navigation easier
- Replaced "Create New Scan" option with "+ Add Scan" on the Scans page
- Removed PowerBI based Reports for Finder and Watcher as these reports duplicated the dashboard information
- Removed unused "Global Admin Rights" column from User Management List
- Results Upload Status page moved from Scan Status menu item to **Actions** on the Scan Results page. The Scan Status menu item no longer exists
- Scan Results remains on the agent if database maintenance tasks are in process until the process is complete
- The Scan Wizard has Agent Selection tab moved before Target Selection tab
- Updated Agent Management Screen to show Status and Heartbeats for the Agents in separate columns
- Updated the User Profile Screen

SDP Bug Fixes

- Agent policies applied to an agent did not update the Activity Agent policy
- Cloud Agent incorrectly listed as a "Target" in the Scan Results filters
- Cloud Agent logs display "Unable to upload file to Google Drive account" when a Google Drive object was scanned
- Cloud Agent scans of O365 mailboxes was getting failed if account list has not been provided
- Cloud Agent scans of O365 mailboxes intermittently stopped and scans were restarted
- Cloud Agent was unable to connect to Gmail if an account list was not provided
- Filtered Scan Results displayed results that do not conform to the filter request
- On Prem agents reported an "Unable to connect to network resource" error during some manual remediation actions
- Playbook Logic for "Access Date - Last Year" was incorrectly matching based on the last 365 days instead of the last calendar year
- Removed incorrect data tags in custom notifications
- Original scan was loaded instead of the cloned scan if the page was refreshed during cloning a scan
- Exchange Online mailboxes scan by Cloud Agents did not scan attachments

Spirion Sensitive Data Finder Release Notes

Sensitive Data Finder (SDFinder) Release Notes

Version: 22.Q1.1

Release date: 02.01.22

SD Finder New Features

-

SD Finder Enhancements

- Replaced "New Subject Request" option with "+Add Subject Request" on the Subject Requests screen of the Sensitive Data Finder.

SD Finder Bug Fixes

- Erasure Checklist can not be shared until after all items have been completed
- Removed ability to generate a Subject Request report before the Subject Request was completed

Spirion Sensitive Data Watcher Release Notes

Sensitive Data Watcher (SDWatcher) Release Notes

Version: 22.Q1.1

Release date: 02.01.22

SD Watcher New Features

- No new features in this release

SD Watcher Enhancements

- Added version numbers to Queries
- Corrected Dashboard links to send users to the correct page/tab

SD Watcher Bug Fixes

- Activity Watcher Incidents did not load Incident Details
