Spirion Sensitive Data Platform Release Notes

Sensitive Data Platform (SDP) Release Notes

Version 22.Q2.1

Release date: 07.15.2022

SDP New Features and EnhancementsA

- Scan Coverage
    - ○ Provides the ability to understand what Targets and Data Types have been scanned, but it's just as important to know what hasn't been scanned. With SDP Scan Coverage, you can adeptly oversee your entire data environment.
    - ○ Provides an audit-trail history to view all scans for the selected Target and see key information associated with each scan.
    - ○ Beyond this scan history, SDP Scan Coverage identifies what hasn't been scanned, so you can increase coverage where needed to ensure that there are no hidden pockets of vulnerable data.

SDP Minor Enhancements

- Allowed direct page linking within the application (log in still required)
- Improved Scan Result importing to reduce chances of failed imports
- Returned Assets & Targets menu item to the default Data Asset Inventory menu item
- Updated all tables to have a floating Ellipsis menu
- Updated filters across the application to remember previous settings if page is navigated away from
- Updated Scan Configuration to allow the option to send the full match, masked matches, or no match if Sensitive Data Finder is disabled
- Updated the Tag Management Screen to show targets more clearly within the tag group

SDP Bug Fixes

- Resolved MIP Label Sync Issue
- Disabled the Use Classification Prefix check box on the Add Classification pop-up window when a custom type classification is selected
- Resolved the complex Playbooks issue to correctly execute and perform the correct manual action

- Updated scan results filters to display all agents' results when using distributed scans
- Resolved issue where scans 'last used' status was not accurately reported
- Removed red highlight from Upload Status error messages
- Resolved Playbook 500 errors when updating Playbook currently in use in a scan
- Added hyperlinks to Scan Coverage Details for Scan Name and Playbook Name
- Enhanced Scan Coverage screen to display large numbers of Playbooks
- Enhanced error messages when adding duplicate users in user management

SDP Bug Fixes

- Some large playbooks are timing out when attempting to load in the UI
- Resolved some deadlocking issues within the platform database during policy updates
- Updated validation message in User Management's CSV import functionality
- When saving a new classification if the "Sensitivity" type was ever selected but is not the type at save, saving failed.

Spirion Sensitive Data Finder Release Notes

Sensitive Data Finder (SDFinder) Release Notes

Version 22.Q2.1

Release date: 07.15.22

SD Finder New Features

- No new features in this release

SD Finder Enhancements

- No enhancements in this release

SD Finder Bug Fixes

- No Bug Fixes in this release

Spirion Sensitive Data Watcher Release Notes

Sensitive Data Watcher (SDWatcher) Release Notes

Version 22.Q2.1

Release date: 07.15.22

SD Watcher New Features

- No new features in this release

SD Watcher Enhancements

- No new enhancements in this release.

SD Watcher Bug Fixes

- No new bug fixes in this release.
