Spirion Sensitive Data Platform Release Notes

Sensitive Data Platform (SDP) Release Notes

Version 22.Q2.1
Release date: 05.02.22

SDP New Features

Scan Coverage
Scan Coverage provides the ability to understand what Targets and Data Types have been scanned, as well as what hasn't been scanned. With SDP Scan Coverage, you can efficiently and seamlessly oversee your entire data environment.
SDP Scan Coverage allows you to view all the scans history associated with the selected Target and see details associated with each scan.
Beyond providing the scan history details, SDP Scan Coverage also identifies what data types hasn't been scanned. This is how Scan Coverage ensures that there are no hidden sensitive and vulnerable data.

SDP Enhancements

- Allowed direct page linking within the application. However, log is still required to display the selected menu level in the URL
- Improved Scan Results importing to reduce chances of failed imports
- Modified the Assets and Targets menu to display as the first option on the Data Asset and Inventory navigation menu
- Updated the ellipsis menus to display on hover for all the screens that contains information in a grid
- Updated filters across the application to remember previous settings if you leave and returns to the page later
- Updated the Scan Configuration process to display the Send Match and Send Only Last Four Characters options in the Advanced Options screen only when the Sensitive Data Finder feature is disabled
- Updated the Tag Management Screen to show targets more clearly within the tag group

SDP Bug Fixes

- Some large playbooks are timing out when attempting to load in the UI
- Resolved some deadlocking issues within the platform database during policy updates
- Updated validation message in User Management's CSV import functionality
- When saving a new classification if the "Sensitivity" type was ever selected but is not the type at save, saving failed

Spirion Sensitive Data Finder Release Notes

Sensitive Data Finder (SDFinder) Release Notes

Version 22.Q2.1
Release date: 05.02.22

SD Finder New Features

- No new features in this release

SD Finder Enhancements

- No enhancements in this release

SD Finder Bug Fixes

- No Bug Fixes in this release

Spirion Sensitive Data Watcher Release Notes

Sensitive Data Watcher (SDWatcher) Release Notes

Version 22.Q2.1
Release date: 05.02.22

SD Watcher New Features

- No new features in this release

SD Watcher Enhancements

- No new features in this release

SD Watcher Bug Fixes

- No Bug Fixes in this release
