Spirion Sensitive Data Platform Release Notes

Version 23.Q2.3.199.0

Release date: 10.23.2023

Improvements and New Features

1. Released Agent 13.0.0 with improved results management of Scans in near real-time to include:

- Inline Scan status updated to more accurately reflect Scan progress
- New view providing greater summary insight into current scan location, agents, and progress
- Immediate visual cue on whether a scan has found any sensitive information
- Ability to visualize scan results in near-real-time as a scan is progressing

2. Improved Agent Status and Health Display. The online status now displays behavior:

- Idle
- Performing Discovery
- Scanning
- Critical Failure Status

3. Enable inline classifications of content as it is scanned allowing for instant classification of sensitive content.

Bug Fixes

- Resolved issue where manual classifications of PDFs were not applying appropriately.
